## VIE DI ACCESSO CHIRURGICHE ALL'ANCA

The image contains three handwritten sketches illustrating surgical approaches to the hip. The top sketch shows a femoral approach, with a line indicating the incision site along the femoral shaft. The middle sketch shows a gluteal approach, with a line indicating the incision site over the greater trochanter. The bottom sketch shows a more complex approach, possibly a combined or modified approach, with multiple lines indicating the incision site and the path of the surgical approach.
